

Smart Watch Settings

This section describes in simple steps how to create a remote control session. The process for creating a connection for a VPN session or file transfer is the same. To learn about other options for establishing a connection and other functions, see Section 7 "Other connection options", Page 33, Section 7.3 "Establish a connection via a Windows shortcut", Page 35 and Section 10 "Miscellaneous functions", Page 78. To connect with a partner for a remote control session, follow these steps:

- 1. Open up TeamViewer.**
- 2. Click the Remote Control tab.**
- 3. Ask your partner to start the TeamViewer full version or TeamViewer QuickSupport (see section 11.2 , page 92).**
- 4. Ask your partner for his/her TeamViewer ID and password.**
- 5. Enter your partner's ID in the Partner ID combo box.**

- 6. Click the Remote control option button.**
- 7. Click the Connect to partner button. The TeamViewer Authentication dialog box will open.**
- 8. Enter the password of the remote computer.**
- 9. Click Log On.**
- 10. You are now connected to your partner's computer.**
